Processing and sharing specification status can be:

- **In development** – work is under way to create and agree a processing and sharing specification;
- **Active** – the processing and sharing specification has been agreed by the sharing organisation(s) and the information included within the scope of the processing and sharing specification is available to support the provision of care by the named user organisations;

## Schedule D – Other (Secondary) Uses Processing and Sharing Register Regional Health and Social Care Information Sharing Agreement

---

- **Terminated** – the end date for the processing and sharing specification has been reached and the requirement is no longer active; and
- **Suspended** – for a temporary period the information provided under the processing and sharing specification is not needed or one or more issues have been identified with the information or the way the information is used and the processing and sharing specification has been temporarily suspended.

Controller status for the sharing specification can be:

- **Sole control** – where each sharing organisation retains control over the purpose, scope and means of the processing and sharing of that organisation’s shared information;
- **Joint control** – where multiple organisations have jointly agreed on the purpose, scope and means of the processing and sharing of those organisations shared information. For jointly controlled sharing arrangements the identity of the lead controller for the joint arrangement is included under control status.
